South Carolina Public Service Commission

Dear Public Service Commission,

There is NO GOOD REASON for me to support with my money the dirty, old energy investments in coal and nuclear power. This is a perfect chance for NC to create sustainable jobs, reduce risks of environmental catastrophes, and take a positive leadership role as a State, by investing in the cheaper renewable technologies Duke's executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians.

Sincerely,

Susan Woodard
